Foreword

This publication is one of a monthly series containing data on medical assistance payments made under Title XIX of the Social Security Act (Medicaid). Information is compiled and reported by each State and/or jurisidictional agency administering an approved Title XIX program on Federal Report Form SRS-NCSS-120: Monthly Statistical Report on Medical Care. Currently there are 54 such programs in 49 States, the District of Columbia, Guam, Puerto Rico and the Virgin Islands. Arizona has not initiated a Title XIX program and Massachusetts has a separate State agency for blind recipients.

Prior to January 1974, similar data were collected for the midmonth of each quarter and midmonth quarterly reports have been published in this series since May 1967.

Reports for the months of March, June and September will include quarterly summary data and in addition, reports for December will include annual summary data.

Information presented include medical payments by form of payment, payments to medical vendors by type of service, number of recipients in whose behalf medical vendor payments were made, and data related to screening services under the Early and Periodic Screening, Diagnosis and Treatment Program.

This report was prepared by Henrietta Duvall and Annie J. Mayfield, with the assistance of Robert Terrell, National Center for Social Statistics.

Introduction

Medicaid (Title XIX of the Social Security Act) is an assistance program designed to provide medical assistance to specified groups of needy individuals. Such persons are classified into two main groups according to their maintenance assistance status, (1) those who are authorized to receive money payments for their basic necessities under public assistance programs such as Supplemental Security Income and Aid to Families with Dependent Children, and (2) those who are not receiving maintenance assistance payments even though they may, in fact, be eligible. There are extensions of the maintenance assistance status categories but uniform procedures do not exist for reporting such data. There are four basic eligibility requirements for medical assistance: (1) age 65 and over; (2) blindness; (3) permanent and total disability; and (4) membership in families with dependent children. In addition, some States have exercised the option of including other needy persons who do not fall into any of the above categories. Such recipients are classified as 'Other title XIX' recipients in the accompanying tables. Also, 'essential persons' (usually spouses) may also be eligible for medical care. For money payment recipients, these persons are usually classified according to the same eligibility factors as the recipient spouse.

Generally, payments are made out of Medicaid funds to vendors (providers) of medical services, directly or through a fiscal agent as the direct results of claims filed by the provider after services are rendered. Data presented in this publication are generated as an adjunct to the Medicaid claims processing and payment operation. Thus, information is based on bills paid and not services rendered during the month. Consequently, the data provided through this process are not professed to represent a true picture of the incidence of illness among Medicaid eligibles and are subject to fluctuations unrelated to the provision of medical care. Monthly data are collected and presented to meet pressing current demands for minimum information on medical care financed under title XIX. However, States are required to provide more significant and detailed annual data on the numbers of persons receiving medical services, the number of units of such services and the corresponding amounts of payments.

Except for payments, data related to screening services are not necessarily generated through the claims payment process. Numbers of individuals screened are usually based on services actually rendered during the report month. As a result, payments reported for screening services may be unrelated to persons receiving such services.

HIGHLIGHTS

A record high of $1.231 billion were paid out of Title XIX funds in June 1975, an increase of $94 million over May and $56 million above the previous monthly high recorded in April 1975. Average monthly payments for the year ending June 1975 equalled $1.058 billion, an increase of 2.4 percent over the average for the year ending in May. (This represented the highest average monthly increase observed since the moving average technique was initiated in January 1975.) In the recent past, June has not been a month for record highs in Medicaid expenditures. However, record monthly Medicaid expenditures have become a frequent event, occurring in eight of the past twelve months.

Approximately 9.1 million recipients 1/ had vendor payments totalling $1.192 billion made in their behalf. There was an increase of 400,000 recipients over May, however the caseload did not reach the record number recorded for March. Interestingly, however, two eligibility groups: aged 65 and over and permanently and totally disabled did evince higher numbers of recipients in June than in March. As shown elsewhere, payments for these two eligibility groups constituted more than 60 percent of the expenditures.

There were concurrently 348,605 persons enrolled in health maintenance organizations whose premiums of $10,407,020 were paid cut of Title XIX funds.

Persons Served

The percentage distribution of persons for whom medical payments were made by basis of eligibility and money payment status for June is as follows:

Basis of eligibility	Money Payment Status		
	Total	Money payment authorized	Money payment not authorized
	Percent		
Total	100.0	76.6	23.4
Aged 65 and over	22.6	14.3	8.3
Blindness	0.5	0.4	0.1
Permanently and totally disabled	13.4	10.5	2.9
Children under 21 in families	34.8	31.2	3.6
Adults in families with dependent children	21.7	20.2	1.5
Other Title XIX under 21	3.3	xxx	3.3
Other Title XIX age 21-64	3.7	xxx	3.7

More than half (56.5 percent) of the recipients for whom vendor payments were made were members of families with dependent children. Children under 21 in families and other Title XIX recipients under 21 accounted for 38.1 percent of recipients. Recipients eligible on the basis of age 65 and over accounted for 22.6 percent of the caseload. Recipients who also received money payments outnumbered nonmoney payment recipients by more than 3 to 1. Among members of families with dependent children under 21, nine out of ten medicaid recipients also received AFDC money payments.

Medical Payments by Groups of Persons Served

As shown below, the distribution of payments differs significantly from the caseload distribution. Payments for persons not receiving maintenance assistance are nearly equal to those for money payment recipients. The single largest proportion of payments (25.1 percent) are made on behalf of recipients aged 65 and older who are not also recipients of maintenance assistance. Such recipients represent only 8.3 percent of the caseload. Payments for these recipients, to a large extent, are made to medical inpatient facilities, which represent the more expensive types of medical services. Only 19.1 percent (about half of the corresponding recipient proportion) of payments are made on behalf of children under 21 years of age. Among the eligibility groups under age 65, the largest proportion of payments (25.7 percent) are made on behalf of the permanently and totally disabled.

Basis of eligibility	Money Payment Status		
	Total	Money payment authorized	Money payment not authorized
	Percent		
Total	100.0	55.2	44.8
Aged 65 and over	35.7	10.6	25.1
Blindness	0.7	0.4	0.2
Permanently and totally disabled	25.7	16.7	9.0
Children under 21 in families	16.1	13.5	2.6
Adults in families with dependent children	15.7	13.9	1.8
Other Title XIX under 21	3.0	xxx	3.0
Other Title XIX age 21-64	3.2	xxx	3.2

Payments by Type of Services

Payments for intermediate care facility services exceeded $200 million for the first time in June 1975. A larger proportion of payments were made to intermediate care facilities (18.6 percent) than to skilled nursing facilities (17.9 percent). More than half of the Medicaid payments in the States of Iowa, Louisiana, Nebraska, Oklahoma, Tennessee, and Texas went to intermediate care facilities. Only once before (April 1974) in this monthly series have payments to intermediate care facilities exceeded those to skilled nursing facilities. Payments to inpatient (institutional) facilities constituted 69 percent of medical vendor payments, with inpatient hospital services representing the additional 32.5 percent. Average monthly increases in payments for the year ending in June were higher than the total for both intermediate care facilities (2.7 percent) and inpatient hospitals (2.5 percent). However, the relatively small average monthly increase in payments to skilled nursing facilities (1.3 percent) produced an overall 12 month average increase of only 2.2 percent for inpatient services. In contrast, the average monthly increase in outpatient and other practitioners' services was 2.7 percent over the year ending in May. The highest rates of increase were observed for clinic and outpatient hospital services. Physicians' services and prescribed drugs accounted for 10.2 and 6.2 percent of total payments. Payments for outpatient hospital and clinic services combined constituted 6.7 percent of the total.

Screening Services

Forty-nine States reported 159,297 children screened under the Early and Periodic Screening, Diagnosis and Treatment Program. Fifty-three percent of the children screened were six years of age and older. About 48 percent of children screened had referrable conditions uncovered and eighty-four percent of those with conditions uncovered were referred for diagnosis and/or treatment.

1/ Includes recipient estimates for Colorado and Wyoming which were based on average payments per recipient from prior months, with an inflation factor for Colorado. The recipient count for North Carolina was judged to be 170,000 because the average payment yielded too high a result.

ANNOTATIONS

1. The following definitions apply to the symbols appearing in the detailed tables:

   --- indicates no data reported.
   *** indicates that the percent was not computed because the base was too small.
   Z indicates that the percent was less than 0.05.

2. Arizona has no Title XIX program and is excluded from the tabulations.

3. Colorado and Wyoming did not report recipients or payments by maintenance assistance status and basis of eligibility of recipient and are excluded from all applicable tables. Montana reported recipients and payments by basis of eligibility only. Recipient data were not reported by North Carolina.

4. States do not always report premium or per capita payments into the SSA system for the aged and disabled recipients separately, such as Georgia, Maine, West Virginia, and New York where the payments reported under the aged category include payments for the disabled. There is variance fro month to month in States reporting HMO premium payments because in some cases, such payments may be made less frequently than monthly.

5. Minnesota and Washington included HMO recipients and premium amounts in the data in Tables 2-14.

6. For Michigan, data were partially estimated and recipient and payment data by basis of eligibility and maintenance status were partially estimated by New York.

7. In addition to Colorado and Wyoming; Massachusetts, Nevada, Pennsylvania, and Utah are excluded from Tables 10-13 because children and adults in families were not reported separately. Connecticut, Illinois, Kansas, Minnesota, and West Virginia were able to report children and adults separately but were unable to differentiate medical vendor payments between adults and children in families. These States are excluded from the total percentage computation in Table 11. Pennsylvania did not differentiate other Title XIX recipients by age and is excluded from Table 14.

8. For Utah, all adult recipient i.e., aged 65 and over, blind and disabled are reported under money payment not authorized even though some may be SSI recipients. Nevada reported all adult recipients under money payments authorized.

9. In some States, two or more types of medical services may be grouped together under one class, such as Connecticut where other practitioners', clinic, laboratory and radiological, home health, and family planning services are included in other care, and South Carolina, where skilled nursing facility services include payments to State mental institutions.

10. For some States, differences in vendor payment amounts between Table 3 and Table 5 are due to inclusion of retroactive cash adjustments which can be reported by type of service (Table 5) but which are not applicable to the recipients reported in Tables 2, 4, and 6-9. For the current month, however, Connecticut's expenditures do not include $310,516 in retroactive payments to general hospitals.

11. Payments to mental hospitals in North Dakota and payments to intermediate care facility services in Rhode Island represent two months.

Annotations specific for Screening Tables 15-20

12. States omitted from tables either did not report on screening services for June 1975 or there were no individuals screened during the month.

13. Data for Georgia, Massachusetts, Ohio, and Rhode Island are largely estimated and/or incomplete. Also for Rhode Island, data include 107 newborns, for whom payments are reflected in physicians' or hospital services. For Massachusetts, data include services for medicaid newborns, foster children, and mentally retarded children enrolled in States' special schools.

14. Payments for screening services were not reported by the District of Columbia, Maryland, Massachusetts, North Dakota, and Puerto Rico and payments for Georgia, Idaho, Illinois, Michigan, New York, Ohio, Pennsylvania, Texas, and the Virgin Islands are not reported separately by age.

QUARTERLY HIGHLIGHTS
APRIL-JUNE 1975

A total of $3.547 billion was paid out of Title XIX funds during the quarter ended June 30, 1975, an increase of $208 million (6.2 percent) over the previous quarter and a 22.4 percent increase over the same quarter in the previous year. Vendor payments totalled $3.422 billion; and an additional $31.2 million represented premium payments to health maintenance organizations for an average monthly number of 353,369 enrollees.

Medical vendor payments made to institutional facilities increased by 3.8 percent over the previous quarter. However, payments for nursing home services decreased by 9.7 percent. Nevertheless, nursing home payments were still 20 percent higher than the same quarter a year ago. Payments for inpatient hospital services and intermediate care facility services showed increases of 10.5 and 8.9 percent over the previous quarter. More than a twenty percent increase in payments was observed over the previous quarter for clinic, family planning, dental and other practitioners' services. There was no significant change in payments for prescribed drugs over the previous quarter. (Table Q-1)

The average monthly number of recipients for whom vendor payments were made during the quarter was 8,972,000, a national increase of 2.3 percent over the previous quarter and 7.7 percent over the same quarter, a year ago. The most notable increases in recipients over the previous quarter were among the permanently and totally disabled and adults in families (3.8 percent for each group). Children under 21 in families and Other Title XIX recipients aged 21-64 increased by 2.6 percent and 2.5 percent respectively. An increase of less than one percent was observed for the aged 65 and over and Other Title XIX recipients under age 21. There was a slight decrease in the number of blind recipients from the previous quarter and the numbers of such recipients are nearly 15 percent less than the same quarter a year ago.

Increases in the caseload over the previous quarter were less than half (37 percent) the increase in payments. The general inflationary economic conditions and increased utilization of different services by recipients are probable contributing factors for the greater growth in payments. The highest increases in payments over the previous quarter were observed for the permanently and totally disabled and Other Title XIX recipients under 21, 11.5 percent and 10.9 percent, respectively. Payments made on behalf of members of families with children under 21 increased by 8.4 percent and payments for the aged 65 and over increased slightly more than one percent. Payments made on behalf of blind recipients dropped considerably from the previous quarter.

Seventy-seven percent of the average monthly number of recipients were authorized to receive maintenance assistance in the form of money payments,

however, only 54 percent of medical payments were on behalf of money payment recipients.

A total of 446,476 children was reported as receiving screening services under the Early and Periodic Screening Diagnosis and Treatment Program (EPSDT) during the quarter. Payments for screening services totalled $3.2 million.

Table Q-1.--National Amounts of payments by type of service, quarterly summary
